## Supply Chain Analytics

In this Specialization, learners developed essential skills to discover and solve business problems related to supply chain management via data analytics, including, business intelligence and competitive analysis, demand analytics, inventory analytics, and distribution and logistics strategies. The Specialization also provides a broad overview on job opportunities and intelligence, sourcing and order management, sales and operations planning, and transportation management. In each course, learners completed a real-life data-driven project to practice the skills learned.

Yao Zhao, PhD,  
Professor in Supply  
Chain Management, Co-  
Director of Rutgers  
Supply Chain Analytics  
Lab, Founding Co-  
Director of the Master  
of Supply Chain  
Analytics Program @  
Rutgers Business  
School. Rutgers - the  
State University of New  
Jersey. USA.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
